

There are no translations available.

Níže uvedený postup je vhodný pro porovnání dvou textů, které se liší pouze v rámci jednotlivých řádků, avšak řádky v textu nepřibývají, neubývají ani se nikam nepřesouvají.

Šablona využívá rekurzi, což některým parserům nedělá dobře. Např. Saxon.

Funguje však např. s MSXML - vyzkoušeno.

## XML

<?	xml		version	=
<?	xmlstylesheet		type	=
<	texts	>		
<	text	.	old	>
This is a	sample	text.		

Sample text continues.

This is the	end	.		
That's all folks!	</text	.	old>	
<	text	.	new	>
This is	different	text.		

Sample text continues.

This is the	END	.		
That's all folks!	</text	.	new>	
</texts>				

## XSL
